

BASEL II PILLAR 3 MARKET DISCIPLINE

Annual Disclosure for the year ended December 31, 2014 The public disclosure of prudential information is an important component of Basel Committee on Banking Supervision's framework of capital measurement and capital adequacy, known as Basel II. Bangladesh Bank has specified the standard of disclosure through Guidelines on Risk Based Capital Adequacy (December 2010). The standard aims to enhance the transparency in Bangladeshi financia market by setting minimum requirement for the disclosure of information on the risk management practice and capital adequacy.

In line with the Bangladesh Bank BRPD Circular no. 35 of 29 December 2010 as to Guidelines on 'Risk Based Capital Adequacy for Banks', following detailed qualitative and quantities disclosures are provided in accordance with the central bank directions covering scope of capital adequacy framework, capital of the bank, risk exposure and assessment methodology, risk mitigation strategies and capital adequacy of the bank.

1. SCOPE OF APPLICATION:

Qualitative Disclosures

a) The name of top corporate entity in the group to which this **Bank Asia Limited** guidelines applies

The consolidated financial statements of the Bank include the financial statements of i) Bank Asia Limited ii) Bank Asia Securities Limited iii) BA Exchange Company (UK) Limited. and iv) BA Express USA Inc.

3. CAPITAL ADEQUACY

Qualitative Disclosures

Capital calculation approach

With regard to regulatory capital computation approaches (Minimum Capital Requirement) the bank is following the prescribed approach of Bangladesh Bank. Below are risk wise capital computation approaches that the bank is currently applying:

- Credit Risk Standardized Approach (SA)
- Market Risk Standardized Approach (SA)
- Operational Risk Basic Indicator Approach (BIA)

Capital of the Bank

In parallel to business growth, the bank is effectively manages its capital to meet regulatory requirement considering the risk profile. Below are few highlights:

- Currently Bangladesh Bank prescribed Minimum Capital Adequacy Ratio (CAR) is 10%, whereas as on December 2014 the CAR of the bank was 11.32%.
- During the same period Minimum Capital Requirement (MCR) of the bank was BDT 15,757.46 million and eligible capital was BDT 17,843.22 million; i.e. the bank hold BDT 2,085.76 million surplus capital.

Reduction of Capital Requirement through increasing Rated Clients:

As per Basel-II norms capital adequacy i.e. buffer capital is a must for banks to protect the unexpected losses against the risk profile and future business growth of the bank. Under the Standardized Approach of the RBCA guidelines of Basel-II, counterparties credit rating are determined on the basis of risk profile assessed by the External Credit Assessment Institutions (ECAIs) duly recognized by Bangladesh Bank to derive risk-weights of exposures under the portfolio of claims. According to the guideline, the rated exposures of a bank will reduce the Risk Weights and the regulatory capital requirement as well as create the room to expand the business of the bank. This will also enable the bank to assess the creditworthiness of the borrowers as well, to an acceptable level.

To withstand these challenges, the Board of Directors & the Senior Management of the bank emphasized rigorously round the year 2014 on corporate borrowers credit rating to lower our risk profile as well as to reduce the capital requirement of the bank. Accordingly, the Risk Management Unit of the bank along with Corporate Asset and Client Origination (CACO) & Credit Risk Management (CRM) team has taken all-out efforts to increase the number of corporate borrower's exposures under rated. They are constantly taking the initiatives through guidance of the Senior Management; series of meetings, correspondence, awareness program with the allied concerns i.e. branches of the bank & ECAIs. As a result of strong persuasion & drive, the number of rated borrowers of the bank increased to 660 nos. at the end of the year 2014 from 179 nos a year ago. A review of the capital relief (both funded & non-funded exposure) reveals that till December 31, 2014, we have achieved total capital relief of Tk. 3,458.70 million from the rated borrowers.

A summary discussion of the Bank's approach to assessing the adequacy of its capital to support current and future activities

4. CREDIT RISK

Qualitative Disclosures

The general qualitative disclosure requirement with respect to credit risk, including:

Bank classifies loans and advances (loans and bill discount in the nature of an advance) into performing and non-performing loans (NPL) in accordance with the Bangladesh Bank guidelines in this respect.

An NPA (impaired) is defined as a loan or an advance where interest and/ or installment of principal remain overdue for more than 90 days in respect of a Continuous credit, Demand loan or a Term Loan etc except term loan below Tk 10 lac.

Classified loan is categorized under following 03 (three) categories:

- > Sub-standard
- > Doubtful
- > Bad & Loss

Any continuous loan will be classified as:

i. 'Sub-standard' if it is past due/overdue for 03 (three) months or beyond but less than 06 (six) months. ii. 'Doubtful' if it is past due/overdue for 06 (six) months or beyond but less than 09 (nine) months iii. 'Bad/Loss' if it is past due/overdue for 09 (nine) months or beyond.

Any Demand Loan will be classified as:

i. 'Sub-standard' if it remains past due/overdue for 03 (three) months or beyond but not over 06 (six) months from the date of expiry or claim by the bank or from the date of creation of forced loan.

ii. 'Doubtful' if it remains past due/overdue for 06 (six) months or beyond but not over 09 (nine) months from the date of expiry or claim by the bank or from the date of creation of forced loan.

iii. 'Bad/Loss' if it remains past due/overdue for 09 (nine) months or beyond from the date of expiry or claim by the bank or from the date of creation of forced loan.

Term loan will be classified as:

(A) In case of any installment(s) or part of installment(s) of a Fixed Term Loan

amounting up to Tk. 10.00 Lacs is not repaid within the due date, the amount of unpaid installment(s) will be termed as 'past due or overdue installment'. In case of such types of Fixed Term Loans:

- i. If the amount of past due installment is equal to or more than the amount of installment(s) due within 06 (six) months, the entire loan will be classified as 'Sub-standard'.
- ii. If the amount of past due installment is equal to or more than the amount of installment(s) due within 09 (nine) months, the entire loan will be classified as "Doubtful".
- iii. If the amount of past due installment is equal to or more than the amount of installment(s) due within 12 (twelve) months, the entire loan will be

classified as "Bad/Loss".

(B) In case of any installment(s) or part of installment(s) of a Fixed Term Loan amounting more than Tk. 10.00 Lacs is not repaid within the due date, the amount of unpaid installment(s) will be termed as 'past due or overdue installment'. In case of such types of Fixed Term Loans:

i. If the amount of past due installment is equal to or more than the amount of installment(s) due within 03 (three) months, the entire loan will be classified as "Sub-standard".

ii. If the amount of past due installment is equal to or more than the amount of installment(s) due within 06 (six) months, the entire loan will be classified as "Doubtful".

iii. If the amount of past due installment is equal to or more than the amount of installment(s) due within 09 (nine) months, the entire loan will be classified as "Bad/Loss".

6. INTEREST RATE RISK IN THE BANKING BOOK

Qualitative Disclosures

The general qualitative disclosure requirement including the nature of IRRBB and key assumptions, including assumptions regarding loan prepayments and behavior of nonmaturity deposits, and frequency of IRRBB measurement Interest rate risk is the potential that the value of the On Balance Sheet and the Off Balance Sheet position of the Bank would be negatively effected with the change in the Interest rate. The vulnerability of an institution towards the advance movement of the interest rate can be gauged by using Duration GAP under Stress Testing Analysis.

Bank has also been exercising the Strees Testing using the Duration GAP for measuring the Interest Rate Risk on its On Balance Sheet exposure for estimating the impact of the net change in the market value of equity on the Capital Adequacy Ratio (CAR) due to change in interest rates only on its On Balance Sheet position (as the Bank holds no interest bearing Off Balance Sheet positions and or Derivatives). Under the assumption of three different interests rate changes i.e. 1%, 2% and 3%.

7. MARKET RISK

Qualitative Disclosu	Qualitative Disclosures				
Views of BOD on trading/ investment actives	The Board approves all policies related to market risk, sets limits and reviews compliance on a regular basis. The objective is to provide cost effective funding last year to finance asset growth and trade related transaction.				
Methods used to measure Market risk	Standardized approach has been used to measure the market risk. The total capital requirement in respect of market risk is the aggregate capital requirement calculated for each of the risk sub-categories. For each risk category minimum capital requirement is measured in terms of two separately calculated capital charges for 'specific risk' and 'general market risk'.				
Market risk Management system	The Treasury Division manage market risk covering liquidity, interest rate and foreign exchange risks with oversight from Asset-Liability Management Committee (ALCO) comprising senior executives of the Bank. ALCO is chaired by the Managing Director. Alco meets at least once in a month.				
Policies and process for mitigating market risk	There are approved limits for Market risk related instruments both on-balance sheet and off-balance sheet items. The limits are monitored and enforced on a regular basis to protect against market risks. The exchange rate committee of the Bank meets on a daily basis to review the prevailing market condition, exchange rate, forex position and transactions to mitigate foreign exchange risks.

8. OPERATIONAL RISK

Qualitative Disclosures		
Views of BOD on system to reduce Operational Risk	The policy for operational risks including internal control & compliance risk is approved by the board taking into account relevant guidelines of Bangladesh Bank. Audit Committee of the Board oversees the activities of Internal Control & Compliance Division to protect against all operational risk.	
Performance gap of executives and staffs	Bank has a policy to provide competitive package and best working environment to attract and retain the most talented people available in the industry. BA's strong brand image plays an important role in employee motivation. As a result, there is no significant performance gap.	
Potential external events	No potential external event is expected to expose the Bank to significant operational risk.	
Policies and processes for mitigating operational risk	Operational risk, defined as any risk that is not categorized as market or credit risk, is the risk of loss arising from inadequate or failed internal processes, people and systems or from external events. It is inherent in every business organization and covers a wide spectrum of issues. In order to mitigate this, internal control and internal audit systems are used as the primary means. The Bank Asia Limited manages this risk through a control based environment in which processes are documented, authorization is independent and transactions are reconciled and monitored. This is supported by an independent program of periodic reviews undertaken by internal audit, and by monitoring external operational risk events, which ensure that the bank stays in line with industry best practice and takes account of lessons learned from publicized operational failures within the financial services industry. Bank Asia Limited has operational risk management process which explains how the bank manages its operational risk by identifying, assessing, monitoring, controlling and mitigating the risk, rectifying operational risk events, and implementing any additional procedures required for compliance with central bank requirements. Operational risk management responsibility is assigned to different level of management within the business operation. Information systems are used to record the identification and assessment of operational risks and to generate appropriate regular management reporting. Risk assessment incorporates a regular review of identified risks to monitor significant changes.	
	risk and adoption of Key Risk Indicator (KRI) to help the bank to set operational risk trigger parameters.	
Approach for calculating capital charge for operational risk	Basic Indicator Approach was used for calculating capital charge for operational risk as of the reporting date.
